

Driven by a love of plants, Pure Sunfarms is one of Canada's largest, single-site, licensed producers of high-quality, greenhouse-grown cannabis based in BC's Fraser Valley (Delta). We are proud to bring together individuals from a wide breadth of industries, backgrounds, and experiences, and promote a culture of belonging where everyone can truly be themselves – in every form of expression that is natural to them. This is our priority and guiding light at Pure Sunfarms, driving our uncompromising approach to quality and success within the Canadian recreational cannabis market. We believe our differences are our strengths, letting us look at cannabis in a whole new light.

### ESSENTIAL FUNCTIONS

- **HVAC Systems Optimization:** We need you tuned in 100% to the different process climates inside our facility. They need to operate flawlessly, accurately, and consistently. You will help build the scientific understanding to continually tweak settings to achieve improved process outputs.
- **Production Support:** Daily check-ins with your areas will identify opportunities for improvement. You will make sure that the production team's climates are on point – they are your primary customer!
- **Maintenance Support:** The maintenance team needs all the relevant knowledge, parts and frameworks to keep your areas operating at high availability – you work closely with them from the start of the project to design for maintainability and minimize TCO.
- **Continuous Improvement:** You have a keen eye that identifies and prioritizes improvement opportunities to advance our operations. You pull in the experts, operators, supervisors, and maintenance, to understand and quickly implement using lean principles

### OTHER DUTIES

We work in a fast pace environment, rolling up our sleeves to build something bigger than ourselves. Other duties may arise from time to time/most of the time and as a team, we look to support each other.

### YOUR BRAND, YOUR STORY

We already know you love working on the front lines of manufacturing with your engineering expertise, but we want to know more about your strengths. You're good at the following:

- Completion of HVAC Diploma or Certificate from an accredited institution
- Experience with equipment & standards encountered in the food, beverage, or pharma industries (GPP, GMP, HAACP, SQF, ISO)
- Experience in Process Industries where controlled climates are critical to quality and output
- Experience with plants, agriculture, drying and curing processes is desirable
- You have detailed knowledge of HVAC systems, dehumidifiers, controlled environment agriculture control systems, humidifiers, and cooling towers and systems
- You know your way around building management systems (BMS'), BACnet, Honeywell/Niagara an asset.
- You're not afraid to get your hands dirty. That's how the best engineers and specialists learn.
- Cannabis knowledge an asset
- Must have the ability to obtain and pass a RCMP Criminal Record Check and maintain security clearance.

## **HVAC Technician**

At Pure Sunfarms, we are growing our team with the same care we devote to growing our plants. We're proud of the diverse and inclusive culture that we've built, and are excited to learn more about your experiences and how you can contribute to Pure Sunfarms and the cannabis industry.
