

Driven by a love of plants, Pure Sunfarms is one of Canada's largest, single-site, licensed producers of high-quality, greenhouse-grown cannabis based in BC's Fraser Valley (Delta). We are proud to bring together individuals from a wide breadth of industries, backgrounds, and experiences, and promote a culture of belonging where everyone can truly be themselves – in every form of expression that is natural to them. This is our priority and guiding light at Pure Sunfarms, driving our uncompromising approach to quality and success within the Canadian recreational cannabis market. We believe our differences are our strengths, letting us look at cannabis in a whole new light.

ESSENTIAL FUNCTIONS

- **New Product Introduction:** developing processes feasible for production scale, specifying, and implementing new equipment to satisfy safety, quality, throughput, and cost goals; working with QA to qualify new equipment and processes; ensuring sustainability post-transition to maintenance and production
- **Production Support:** Daily check-ins with your areas will identify opportunities for improvement. You will make sure that the production team has the tools they need to accomplish their goals – they are your primary customer!
- **Maintenance Support:** The maintenance team needs all the relevant knowledge, parts and frameworks to keep your areas operating at high availability – you work closely with them from the start of the project to design for maintainability and minimize TCO.
- **Continuous Improvement:** You have a keen eye that identifies and prioritizes improvement opportunities to advance our operations. You pull in the experts, operators, supervisors, and maintenance, to understand and quickly implement using lean principles

OTHER DUTIES

We thrive in a fast pace environment, rolling up our sleeves to build something bigger than ourselves. Other duties may arise from time to time and as a team, we look to support each other.

YOUR BRAND YOUR STORY

We already know you love working on the front lines of manufacturing with your engineering expertise, but we want to know more about your story and experiences. You are good at the following:

- Engineering degree or relevant experience
- Experience with equipment & standards encountered in the food, beverage, or pharma industries (GPP, GMP, HACCP, SQF, ISO)

- Fast-moving consumer goods (FMCG) or consumer packaged goods (CPG) experience an asset (you are familiar with packaging and labelling – in all its forms and options – and the equipment that makes it happen)
- You know electrical control and safety circuits, hydraulic & pneumatic schematics and components, and are familiar with PLCs and HMIs – and how they all fit together to make machines sing.
- You are not afraid to get your hands dirty. That is how the best engineers learn.
- Cannabis knowledge an asset
- Experience with lean six sigma is preferred
- P.Eng an asset
- Must have the ability to obtain and pass a RCMP Criminal Record Check and maintain security clearance.

At Pure Sunfarms, we are growing our team with the same care we devote to growing our plants. We are proud of the diverse and inclusive culture that we have built and are excited to learn more about your experiences and how you can contribute to Pure Sunfarms and the cannabis industry.
